MYWOODMOOD.COM

# our story

In 2019, we introduced the first wooden reusable candle, aiming for an authentic creation crafted from only natural, harmless, and sustainable ingredients. Its resounding success on the local market inspired us to show them to the whole world.

However, the war in Ukraine hit us hard, leading to the loss of our production facility and studio during the first days of the invasion.

Fueled by strong motivation, we reconstructed our workshops as soon as we could, expanding our product range to a new line of home decor.

Today, we persist in crafting novel products, guided by the same core principles:

- Sustainability
- Originality
- Natural components
- Premium quality
- Long-lasting design

WOOD MOOD team enjoys making people happy with emotional gifts and products all over the world.

Our mission is to bring a touch of Nature to every home and to make people in love with real sustainability.

# truly crafted candles

WOOD MOOD candles are greatly admired for their original patented design, eco-friendliness, and easy-refilling with spare inserts. They are seasoned with natural essential oils to create a warm atmosphere with mild natural scents. Recognition is achieved when every smallest detail is taken into account.

We start with handpicking wood by type, size, appearance, and quality. This process is extremely labor-intensive. The wood is selected among firewood leftovers, sourced from construction sites and green area sanitary cuts.

Then selected branches are treated with high temperature, carefully hand-washed, brushed, and cleaned to preserve the bark. For some models, we remove bark intentionally or initiate the wood by fire for black coloring.

When the wooden parts are processed in the workshop, they are moved to the candle studio. We hand-pour each candle into the wooden part, using the finest grade natural beeswax from local farmers, harvested from so-called "cappings". This wax is not treated with any chemicals, and its purity is achieved with manual filtering in a solar furnace only. It gives such magic color and a faint honey scent to candles. We support each other with local beekeepers, as we purchase wax at a fair price, and they supply us with high-quality products.

We designed, patented, and produce our own wicks with clay base to make our candles safe and reusable.

Magic is born when we add fine essential oil to candles. A soft, pleasant aroma envelops the space without causing undue attention to itself. Working with essential oils requires great skill, endurance, and patience. But the result is worth it. Each candle leaves us unique, just like fingerprints, no two are the same.

# classic line candles

Our Classic candle line is a versatile choice that suits many preferences. It comprises three sizes in three distinct styles, making it effortless to select a design that harmonizes with your space and the candle's purpose. We suggest using Classic line candles as gifts, decorations, or even for anti-mosquito tasks.

## sizes

*Compact* and *Original* sizes can be effortlessly refilled using spare inserts. We offer spare inserts with a range of essential oils, allowing you to explore diverse scents and enjoy fragrance combinations.

Size *Patio*, a larger candle, can exclusively be refilled using DIY kit. Additionally, the candle base transforms into a convenient planter for easy reuse.

## styles

*Rocky* candles look magical thanks to preserved natural bark, carefully brushed and cleaned. Solid rustic grooves are felt as a piece of pure nature.

*Ubud* candles are all about the tree's history, preserved in unique traces of woodworms or bizarre coloring made by nature.

*Volcano* candles are masterpieces made of burnt wood with bark, covered with beeswax using our authentic method for saving matte surfaces and preserving the beauty of bark's shape.

# patio size candle

Designed for use indoors and outdoors, *Patio* size candles have a stronger flame to withstand a light breeze and can be offered with an anti-mosquito option.

These extra-wide candles seamlessly complement any table setting, bringing people together with a truly festive ambiance that lasts longer. 40 hours of burn time are provided with an option to refill with DIY kit.

Perfect for year-round enjoyment, whether illuminating summer evenings on the garden patio or creating cherished moments around the Christmas table.

*Black Illusions candle*

# black illusions line

# candles

Our luxury line of the blackest candles with deep aromas of rich essential oils. Polished ebony, flamed to a silky sheen, hand coated with beeswax. As dark as the night, they boast an impeccably smooth matte surface without any compromises.

Like all other WOOD MOOD candles of the Original size, they are easily rechargeable with spare refills for a lasting luxury experience. Original dyed refills for the Black Illusions line of candles are offered.

Infused with the most exquisite niche essential oils, these candles exude true luxury in every facet, from their texture to their fragrance.
